

YOFAM 2002 Proclamation

YOFAM 2001 was a huge success! A great many more people throughout our base communities have become aware of the excellent QoL programs we offer in AFMC and in the AF. New ideas on how to help our entire workforce have been generated and implemented by YOU -- the AFMC family. Leadership at all levels and at all AFMC installations--even our geographically separated units--have emphasized the importance of "taking care of our own." And of course, we spent millions of dollars on new projects and programs to improve the work and family lives of our active duty, civilians, their families, and to the extent possible, our contractors.

Now I want to officially extend the YOFAM program for calendar year 2002. I may even extend it beyond 2002. Perhaps we will not call it "YOFAM" but rather incorporate its essential elements and focus in an existing organization. Rest assured that the emphasis on taking care of our people will continue in AFMC. For now, I say let us continue the success of the program, and let YOFAM 2002 begin!
